

QUALITY POLICY

DeltaNordic is a total systems supplier for the most demanding conditions, delivering solutions for world-class electric and electronic systems throughout the product lifecycle – from design to after sales.

Our quality assurance is based on short and long term goals, action plans and continuous improvements. We regularly follow up on key performance indicators and if goals are not met root causes and corrective actions are identified.

Our products shall be delivered in accordance with customer requirements and order, with quality and on time. To meet customer requirements we continuously improve our processes and routines to create a more effective organisation.
